Kishan Kumar

AI Engineer | Generative AI & RAG Systems

Jhansi, Uttar Pradesh 9219421924 kishank7017@gmail.com LinkedIn GitHub

PROFESSIONAL SUMMARY

Final-year B.Tech student at Bundelkhand Institute of Engineering and Technology with a strong interest in Artificial Intelligence, Generative AI, Machine Learning, and Retrieval-Augmented Generation (RAG). Skilled in Python, LangChain, ChromaDB, Google Gemini API integration, and AI application development.

TECHNICAL SKILLS

Programming	Python
AI & ML	Machine Learning, Deep Learning, Generative AI, RAG, Prompt Engineering, Semantic Search
Frameworks	LangChain, NumPy, TensorFlow/Keras
Databases	ChromaDB
Tools	Git, GitHub, Google Gemini API, News API, Environment Variables (.env)

PROJECTS

AI-Powered News Narrative Comparison System

Python, LangChain, Google Gemini API, News API, ChromaDB, RAG, .env | github.com/kishank7017/news_compare

- Developed a Retrieval-Augmented Generation (RAG) application that collects and analyzes news articles.
- Implemented chunking, embeddings, vector storage, and semantic retrieval using ChromaDB.
- Integrated Gemini models to compare narratives across multiple news sources.
- Enabled natural-language question answering over retrieved news content.

Diabetes Prediction System

Python, Deep Learning, NumPy, TensorFlow/Keras

- Developed a deep learning model to predict diabetes risk using eight health parameters.
- Implemented preprocessing, feature handling, and model inference workflows.
- Built a user-input prediction pipeline for real-time diabetes risk assessment.
- Utilized features including glucose, BMI, insulin, blood pressure, age, and other diagnostic indicators.

EDUCATION

Bachelor of Technology (B.Tech)

Bundelkhand Institute of Engineering and Technology

ACHIEVEMENTS

- Solved 100+ Data Structures and Algorithms problems on LeetCode.
- Built AI projects involving Deep Learning and Retrieval-Augmented Generation (RAG).
- Actively learning Generative AI, LangChain, and LLM application development.
